Subject: HOTSITE REPORT: Update - Freedom Industries, Charleston, WV

OSC Dennis Matlock reports that the WV Department of Environmental Protection (WVDEP) has approved Freedom Industries' plan to divert clean water collected outside the containment wall into the Elk River. The WVDEP issued a modified NPDES permit that includes an additional sampling schedule to confirm clean discharge of water.

The facility completed removal of six fiberglass tanks. The Chemical Safety Board (CSB) was at the facility and their work is scheduled to be done by mid-May.

The facility has received concurrence on their revisions to the Tank Decommissioning Plan for removal of all tanks north of tank 403. Work continues on enhancing the secondary containment around tanks 403, 404, and 405. Freedom is planning to have all tanks down by June 22.
